

WESTCOUNTRY WOOD

BESPOKE GATES

## ABOUT US

Working with homeowners and automation companies across the UK we understand the importance of security for your home or premises without compromising on style. Bespoke wooden and metal driveway gate manufacturing is our primary service. We can also offer a range of railings and panels to perfectly compliment your gates.

We know that excellent customer service is key to success, and at Westcountry Wood we ensure that every one of our customers are happy with the product and service we have provided them with. Most of our new business comes from recommendation, which is testimony to our customer-focused approach.

Our experienced and knowledgeable team, high quality products, excellent customer service, and value for money makes Westcountry Wood the perfect choice for your needs, from bespoke driveway entrance gates, beautiful made to measure side gates, to 5 bar field gates.

# DRIVEWAY GATES

Producing a set of our driveway gates, meticulously hand-crafted, takes anything from 2-7 days. From the selection of the timber or metal to assembling with time-proven techniques, to the safe delivery to your property, we invest in making sure you receive nothing but the highest quality that you would expect.

All of our wooden driveway gates are made suitable for automation and come heavy duty as standard; made with 95x70mm frames and 95x45mm bracing. Manufactured using the finest quality kiln-dried redwood softwood or iroko hardwood, they have a planed-all-round finish with smooth curves and eased edges.

For our metal gates we use 40x40mm box section frames as standard for the majority of the designs, as well as offering a range of finishings such as galvanising or zinc priming, and powder coating in a colour of your choice. We are able to and welcome any specific requests such as extra large 50x50mm box section frames or any ornamental finishing desired.

Our complete bespoke service means that we can achieve our customers wants and needs 99.9% of the time in both style and size.

## SIDE / GARDEN GATES

Side gates can be manufactured in any style to perfectly match your driveway gates, or maybe you have an existing garage door to compliment?

Our timber side gates are manufactured from the finest quality iroko hardwood or Scandinavian redwood softwood, and are assembled using time-proven methods and manufactured with heavy duty sized timbers as standard; 95x70mm framing and 95x45mm bracing.

For our metal gates we use heavy duty box section frames as standard for the majority of the designs, as well as offering a range of finishings such as galvanising or zinc priming, and powder coating in a colour of your choice. We are able to and welcome any specific requests such as extra large or lightweight frames, or any ornamental finishing desired.

## EXTRAS

### POSTS

Westcountry Wood can supply air dried oak posts and pressure treated softwood posts, available up to 8x8" in softwood, and 10x10" in oak. They are available with either a 4-Way-Weather top or a rounded top to perfectly compliment your gates. We can also fabricate steel hollow section posts with a huge range of decorative caps available. These can be galvanised or zinc primed to finish as well as powder coating to a colour of your choice.

### FIXINGS

Westcountry Wood can supply quality fixings for your gates in a variety of finishes. With a huge range of hinges, bolts, latches, and locks, available in a galvanised finish, stainless steel, or black, we have everything you will need to finish off your new gates. As with any bespoke gate, standard hinges will not always fit. At Westcountry Wood, we can fabricate shaped hinges to perfectly fit the shape of your gate. Our fabricated hinges can be made from mild steel with a range of finishes available (such as galvanised, powder coated or wet sprayed to name just a few), or from stainless steel for the perfect blend of strength and aesthetics.

## FINISHING SERVICES

As a bespoke gate manufacturer, our services would not be complete without the option of bespoke finishing.

### STAINING

We can apply a stain to your gate which will enhance the natural beauty of the timber, by bringing out the grain of the wood. We use a selection of products to achieve this in a range of shades, from clear to black (ebony). Most of these products are a 3 coat system which are applied by hand, ensuring that your gate is beautifully and professionally finished.

### ENGRAVING

We can engrave your house name or number onto your gate for that extra personal touch.
